## Terms of Sale

All bids to be per lot as numbered in the catalogue. The authenticity of the coins is guaranteed by the cataloguers; the description of each item is made with great care. We endeavored to describe the books as accurately as possible. What we want to stress here is that the former owner took great care of these valuable works but nevertheless they were used through many years and show signs of it. Additional information will be furnished upon request. All claims must be made within two weeks and no lots are returnable except by agreement with one of the cataloguers.

Bidders must have established credit with the cataloguers or send a deposit equal to 25 % of their bids. Such deposits will be promptly refunded if bids are not successful.

No commission will be charged, but postage and insurance will be added to invoice. For books we have to add a handling and packing charge of 3 %. Remittance must be made promptly after receipt of invoice. A list of prices realized will be sent free of charge to all successful bidders.

The prices are our estimates. The lots may be sold higher or lower according to the bids received. The cataloguers suggest to submit liberal bids. They endeavour to buy for you at the lowest possible price, which means you will get the lot at the usual advance over the next lower bid.

Unlimited bids can not be accepted any more. A collector must place his highest bid for any lot which is urgently wanted. However, the highest bid will be used only to such an extent, as the next highest bid warrants it; as explained in the previous paragraphs.

If a bidder wants to limit his purchases to a certain amount, he may say so, indicating first and second choice. Such bids will be executed with care and as the situation warrants.

By sending in a bidsheet, the bidder agrees to the above stated conditions of sale.

The coins are on exhibit from April 7th until the day before the sale at 101 West 55th St., Apt. 10F, New York 19, N. Y., or before on appointment.

### PAMPHLETS AND SCIENTIFIC ARTICLES, SOME REPRINTS.

The following lots are housed in box files, carefully collected over many years. The contents are of great importance to the collector specializing in various fields.

- |     |  |        |
|-----|--|--------|
| 519 | <b>30 Box Files</b> , cont. close to 1000 pamphlets, articles exclusively on ancient coins by scores of well-known scholars. Among others the following authors are almost completely represented: Bahrfeldt, Imhoof-Blumer, Mowat, Regling, Svoronos. The cataloguers cannot remember that such a wealth of information, collected certainly for over 50 years, has ever been offered for sale. We consider this convolut an excellent acquisition for any classical institution. We consider our estimate of 50c per article very reasonable inasmuch as most of the pamphlets are out of print and hence unobtainable. Added 1 convolut of 25 pamphlets on general numismatics and another convolut of 12 pamphlets pertaining to Swiss numismatics | 500.00 |

## A COLLECTION OF KIPPER COINS

Note: At the beginning of the Thirty Years' War there started in Germany a deterioration of the coinage hitherto unknown. This period from 1618-1622 called "Kipper and Wipper Period" marks the lowest level of German economics comparable only to the inflation after the First World War. With the beginning of the war the princess and cities were in urgent need of money for the procurement of arms. Racketeers proposed to the princess a cure for the dilemma by suggesting a coinage of lower silver contents and lighter weight as the Imperial Mint Edict demanded. The Emperor himself started the minting of this phony money in Vienna and Bohemia. Great quantities of good money went into the melting pot for the fabrication of this practically worthless money. However in 1622 all concerned recognized the urgent need for a reform, resulting in the withdrawal of these abominable coins from circulation. This fact explains the scarcity of many of these coins. They are of poor fabric and usually do not appeal to the average collector. However we feel that collectors interested in the ups and downs of European coinage should not miss the opportunity to secure at least a few of these examples which show so clearly to which low state a coinage can sink in times of war.
